

Andrew Le Blanc

github.com/andrewleblanc1 • andrewleblanc@college.harvard.edu • +1 (956) 371-2350

Education

Harvard University
A.B. Computer Science
3.7 GPA

Cambridge, MA
May 2028

Relevant Coursework: CS 1200 – Algorithms, CS 1210 - Intro to Theoretical CS, CS 1066 - Software Engineering with AI

Experience

Harvard Tech for Social Good
Software Engineer, UNICEF GeoSight Project

Cambridge, MA
September 2026 - Present

- **Contribute to UNICEF's open-source GeoSight platform** using React, Python/Django, and H3 spatial indexing to support geospatial data analysis
- **Develop support for H3-indexed indicator data** to enable geographic analysis independent of administrative boundaries
- **Collaborate on database, API, and frontend visualization functionality** for humanitarian planning and disaster-response applications

GRAIL Center - ConvoLab
Open-Source Software Engineer

Cambridge, MA
September 2026 - Present

- **Test and refine LLM prompts** for ConvoLab, an open-source AI platform for practicing difficult conversations with real-time coaching and communication-skill feedback
- **Implement React UI/UX improvements** within a full-stack application built with React, Fastify/tRPC, Firestore, and WebSockets
- **Contribute to production and mobile-release readiness**, helping prepare the platform for deployment to the Apple App Store and Google Play Store

Projects

Harvard Meal Tracker – github.com/andrewleblanc1/harvardMealTracker, Live website: harvardmealtracker.vercel.app

- Built Harvard's first dining-hall macronutrient and calorie tracker using the **CS50 Dining API**, supporting 12 undergraduate dining halls, Annenberg, and Fly-by for a potential **7,000 students**.
- Built and deployed a **Next.js** frontend with a **Python/FastAPI** backend using the CS50 Dining API, achieving **sub-50 ms** frontend response times and **sub-1 s** backend API calls.

AI Daily Digest – github.com/andrewleblanc1/ai-daily-digest

- **Built an automated Python pipeline** that aggregates AI newsletter (**via RSS**) and recent posts from 10 X accounts (**via a third-party data API**), then uses the **Anthropic API** to generate a curated newsletter delivered by email
- Implemented per-source failure isolation, 24-hour filtering, HTML-to-text cleanup, and scheduled GitHub Actions execution for approximately **\$2/month**

Technical Skills

Languages: Python, JavaScript, SQL

Frameworks/Tools: React, Next.js, Django, FastAPI, Git, GitHub Actions, Firebase, Vercel

Technologies: REST APIs, H3, LLM APIs

Activities

Harvard Texas Club
Event Coordinator & Alumni Outreach Representative

Cambridge, MA
September 2025- Present

- Build relationships with Harvard alumni and external organizations to develop partnerships, startup collaboration, and student-focused programming
